To: Mariah Storey <mariah.storey1@wyo.gov>, Guy Beaudoin <guy.beaudoin@wyo.gov>

I'm sure this reporter is asking every state. I know this answer is "less than five reported" for the first three questions. Would we even have or ever collect the gestational age for the last question?

From: Wyoming Department of Health Website [mailto:ccassidy@ap.org]**Sent:** Wednesday, June 26, 2019 1:38 PM**To:** kim.deti@wyo.gov**Subject:** New submission from Header Contact Form**Name**

Good afternoon,

I am seeking data on induced termination of pregnancy (ITOP)/abortions in Wyoming for the years 2016, 2017 and 2018 if available. I have been searching your website, but I have been unable to locate this.

Here's what I am hoping you can provide:

- _ Total number of abortions recorded/occurred in Wyoming by year for 2016 and 2017 (2018 if available).
- _ Total number of Wyoming residents who received an abortion in Wyoming by year for 2016 and 2017 (2018 if available). This should NOT include any Wyoming residents who received an abortion outside of Wyoming.
- _ Total number of non- Wyoming/unknown residents who received an abortion in Wyoming by year for 2016 and 2017 (2018 if available). If you have information on the state/country of residence for these non-Wyoming residents, please provide it.
- _ Total number of abortions by year by estimate of gestational age for 2016 and 2017 (2018 if available).

Many thanks,
Christina

E-Mail to and from me, in connection with the transaction of public business, is subject to the Wyoming Public Records Act and may be disclosed to third parties.

Hi Kim,

We do collect gestational age on the forms. Yes less than five for all questions.

Mariah

Hello, Ms. Storey,

I am interested in induced terminations of pregnancy/abortions occurring in Wyoming. Does Wyoming publish abortion reports or otherwise make this data available? If so, can I request this data by filling out the Data Request Form, or is the data accessible elsewhere?

Thank you for your help.

Regards,

Tessa Longbons

Hello,

Thank you for contacting the Wyoming Department of Health's Vital Statistics Services (VSS) Office regarding information about Wyoming abortion statistics. Unfortunately, Wyoming State Law (35-6-108) restricts the sharing of abortion data or compilations of abortion data to only local, state, or national public health officials or physicians.

Sincerely,
Mariah Storey

Hello,

I hope you are well – thank you for answering my previous question about abortion reporting in Wyoming. I am interested in abortion reporting across the fifty states, and I was wondering if it would be possible for me to receive a copy of the reporting form that is used to collect abortion data in Wyoming. I understand that Wyoming's abortion statistics are not publicly available, but would like to see a blank copy of the reporting form.

Thanks,

Tessa Longbons

Hi Nicole.

No problem.

No, the reporting of ITOPs is required. W.S. title 35 chapter 6 covers abortions and reporting. W.S. 35-6-107 requires that the form to be completed by the attending physician and sent to the state health officer within 20 days after the abortion is performed. We do not have many facilities that perform abortions. Wyoming residents are likely leaving the state for those services.

Hi Mariah,
Gotcha, thanks so much for explaining. This has been so helpful. So if there are so few, I'd like to make a public records request and ask for copies of the form required by W.S. 35-6-107 since 2012, with redactions for patient privacy. Let me know if you have questions please.

Best,
Nicole

Hi Nicole,

Sorry I guess I could have made this easier by letting you know that the next section (WS 35-6-108) restricts the compilations and reports of abortions as an exception to matter of record, and specifies the compilations shall only be available to a local, state, or national public health official or physician upon written request.

Let me know if any other questions!

Hi Mariah,
Ok thanks for clarifying! So I know you said it's fewer than five in the last five years. So fewer than five since 2012? Can you share the exact number?

I'm also curious if the health department keeps any records or information on the states that Wyoming women travel to for abortions?

Thanks again,
Nicole

[Quoted text hidden]

Mariah Storey <mariah.storey1@wyo.gov>
To: Nicole Knight <knight.nicole@rewire.news>

Thu, Mar 8, 2018 at 4:17 PM

Yes, less than five since 2012. On March 12, 2012 of that year, the Wyoming State Health Officer and the Vital Statistics Services office sent a letter to all licensed physicians in Wyoming reminding physicians that reports of abortion are required. Most physicians responded that they did not perform abortions in Wyoming.

We do not keep any records or information on other states but states can report information to the Center for Disease Control (CDC). On the website, they have a section titled "are data available for my own analysis" where you can download information. The latest information available is 2014, but the table gives numbers of abortions by the state where the abortion was performed by the state of residence. I pulled the data from the sheet and they have 642 Wyoming residents went to the surrounding states for the services in 2014. http://www.cdc.gov/reproductivehealth/Data_Stats/Abortion.htm

Good luck with your article!

The numbers presented by the Wyoming Department of Health Vital Statistics Services (VSS) are based on abortions reported by Wyoming facilities. On March 12, 2012, in an attempt to obtain all abortion numbers, Vital Statistics Services and the State Health Officer sent approximately 3,000 questionnaires to Wyoming licensed physicians. The majority of responses indicated Wyoming physicians do not perform abortions within the state. Our efforts have not changed the number of procedures reported or received within VSS. For more information, Wyoming Statute 35-6-107 details the requirements for reporting an abortion within the state.

The Guttmacher Institute data is from a separate study, which surveyed all known abortion-providing facilities and physicians. This survey asked providers the number of induced abortions performed at their location. The agency can only comment on the numbers reported to VSS.

To: Mariah Storey <mariah.storey1@wyo.gov>

Cc: Alexia Harrist <alexia.harrist1@wyo.gov>, Guy Beaudoin <guy.beaudoin@wyo.gov>

Good afternoon Ms. Burt,

Fetal death/Stillbirth is considered a vital record and follows under the definitions of W.S. 35-1-401 (vi). Wyoming defines stillbirth as a birth after twenty (20) completed weeks of gestation in which a child shows no evidence of life after complete birth. The duties of the State Registrar are to receive, index, and statistically compile returns of births, deaths, stillbirths, marriages and divorces for the entire state. W.S. 35-1-407 a (i) requires that the local registrars register births, stillbirths, and deaths that occur in that district. W.S. 35-1-419 further specifies stillbirth registration requirements. W.S. 35-1-426 discusses the disclosure of these records.

Wyoming State Statutes Title 35 Chapter 6 defines abortion and reporting requirements. W.S. 35-6-107 requires the Vital Statistics Office to develop a report for abortions (paragraph a) and then further specifies that the attending physician to send the report to the state health officer (Dr. Harrist cc'd in this response) within twenty days after the abortion is performed (paragraph b). W.S. 35-6-107 discusses the compilations of abortions and record exception.

Thank you,
Mariah

Good morning,

Thank you for contacting the Wyoming Department of Health Vital Statistics Services (VSS) office regarding information about Wyoming abortion statistics. We have received less than five reports over the last five years. With numbers so low, the details we provide are limited due to privacy concerns and state law.

Thank you,
Mariah

Thank you, Mariah.

The Guttmacher Institute just reported that there were 120 abortions in Wyoming in 2014: <https://www.guttmacher.org/fact-sheet/state-facts-about-abortion-wyoming>

In 2014, some 120 abortions were provided in Wyoming, though not all abortions that occurred in Wyoming were provided to state residents, as some patients may have traveled from other states...

Do you know why their numbers are different than yours?

So it looks like the 120 is based on a survey of 3 physicians (1 is the clinic) in Wyoming that provide abortion services. It looks like they are reporting their numbers to Guttmacher but not to WDH. We know the clinic is Jackson and we did get a report from this facility. I'm wondering if they are only reporting abortions performed for Wyoming residents to WDH while they may be providing services to Idaho residents and not reporting them because they are Idaho residents. They may not realize that regardless of residency abortions needed to be reported if performed in Wyoming. That's just my assumption. I am drafting a response and will send it to you.

Response:

The numbers presented from our office are based on those abortions reported to us by facilities in our state. On March 12, 2012, in attempt to verify accuracy of the numbers, the Vital Statistics Services (VSS) office and the State Health Officer sent nearly 3,000 letters were sent to licensed physicians in Wyoming. Most responses that were received back stated that those doctors do not perform abortions in Wyoming. These efforts have not changed the amount of reports received at our office. For more information, Wyoming Statute 35-6-107 details the requirements for reporting an abortion to the State office.

The Guttmacher Institute data is from a separate study conducted by their organization that surveys the known abortion-providing facilities and physicians. The survey asks the number of induced abortions that were provided at their location. I really cannot speculate why these data are different.

I would suggest a much simpler response:

The numbers presented by the Wyoming Department of Health Vital Statistics Services (VSS) are based on abortions reported by Wyoming facilities to our department. For more information, Wyoming Statute 35-6-107 details the requirements for reporting an abortion within the state.

The Guttmacher Institute data is a separate, private effort. We have no involvement with that study. We can only provide information based on what is reported to our department.

Wed, Oct 4, 2017 at 9:19 AM

Hello,

My name is Madeline Mullholand and I am assisting in developing a planning year for a statewide contraceptive initiative "Family Planning Elevated." I am collecting data for a contraceptive needs report. Part of our research is to look at how many Utah women go to surrounding states to seek abortions, and I was wondering if you could give us access to your vital statistics for abortions from 1995 to present day.

Thank you for your time,

-Madeline Mullholand

Request for Tabulations of Wyoming Data

5 messages

Alexandra Arpaia <aarpaia@guttmacher.org>
To: "mariah.storey1@wyo.gov" <mariah.storey1@wyo.gov>

Thu, Apr 23, 2015 at 12:21 PM

Dear Ms. Storey,

We are writing to ask if you would be able to provide us with some tabulations of Wyoming's abortion data for 2011:

1. One table: cross-tabulations of numbers of abortions (among residents, if possible):

age of woman (single years of age) by race/ethnicity (Non-Hispanic white, Non-Hispanic black, Non-Hispanic other, Hispanic).

[We need age in single years, *or by the following age groups*: (<15, 15-17, 18-19, 20-24, 25-29, 30-34, 35+)]

2. One table: cross-tabulation of numbers of abortions occurring in your state by woman's state of residence (i.e., including residents of other states).

We are asking for these tabulations from all 50 states, and will use the numbers to calculate updated state-level pregnancy statistics, including estimates of unintended pregnancy among women 15-44 residing in each state as well as teen pregnancy rates by race and ethnicity for 2011. The Guttmacher Institute has published periodic estimates of teen pregnancy rates for individual states and the District of Columbia since 1988, allowing states to monitor trends over time. These statistics have been of great value to the public health by enabling comparisons of experiences and measurement of effectiveness of pregnancy prevention and other public health programs. Rates vary markedly by race and Hispanic ethnicity, so it is important to account for these variables. I have attached our most recent report on teen pregnancy statistics report with state-level estimates through 2010. We update these estimates when new data become available and we are hoping to complete our latest round of updates soon.

The Guttmacher Institute recognizes the importance of protecting sensitive data. We understand that any data tabulations you provide are not to be published or shared with others, and we have always maintained strict confidentiality in our use of these data. We never publish the abortion numbers as they are provided; they are adjusted by our own numbers of abortions by state of residence, as counted in our periodic national Abortion Provider Census. In fact, our census data are considered the most credible source for accurate counts of abortions in the U.S., used not only in our own work on unintended and teen pregnancy rates for the U.S., but also by the National Center for Health Statistics (NCHS) for their annual reports on U.S. pregnancies as well.

We appreciate your attention to this request. Please contact me or my assistant, Alex Arpaia, if you have any questions or need more information.

Sincerely,

Kathryn Kost, Ph.D.

Hi Kim,

Following up on our conversation of a moment ago, I've got the following questions about abortions performed in Wyoming:

The most recent annual number of abortions performed and the number for every year going back to 2010?

The current number of licensed abortion clinics operating in the state and the number for 2010?

Thanks,

Ben

Not surprisingly, Ben from AP called with some follow up questions on this issue.

First of all, he is questioning our practice of not providing an actual number when it's less than five statewide and asks how does that risk providing identifiable information?

Second, he would like to perhaps expand on why physicians don't report the procedure and asks if there is any enforcement if they don't. I did mention to him that I know from time to time we have send reminders to providers of the reporting requirement.

From: kim deti [mailto:kim.deti@wyo.gov]
Sent: Friday, May 15, 2015 4:28 PM
To: 'Neary, Ben'
Subject: FW: AP Query on abortion stats

I'm told according to W.S. § 35-6-107 through 109, physicians are required to complete and submit annually to the Wyoming Department of Health (WDH) an Induced Termination of Pregnancy Reporting (ITOP) form if they perform or prescribe an abortion in Wyoming.

The reports would identify the physician and a facility, but I'm told there are limits in statute on what we could retain and report. Obviously, we do not receive many of these reports.

From: kim deti [mailto:kim.deti@wyo.gov]
Sent: Friday, May 15, 2015 2:17 PM
To: 'Neary, Ben'
Subject: RE: AP Query on abortion stats

For each year going back to 2010, the number of reported abortions performed in Wyoming has been less than five. (For statistics provided by our Office of Vital Statistics Services, the standard practice is that we don't provide an exact number of people if the number is less than five due to privacy concerns.)

We do not specifically license abortion clinic facilities through our Office of Healthcare Licensing and Surveys so we have no information available for the second question. There's just no specific requirement or facility category.

Cc: korin schmidt <korin.schmidt1@wyo.gov>, Jim McBride <jim.mcbride@wyo.gov>, Guy Beaudoin <guy.beaudoin@wyo.gov>

We follow National Vital Statistics Services Office policy that any cell counts of less than five even at a statewide should not be published at the risk of identification.

However, let's back up a second. A let him know that 35-6-108 limits the reporting of abortions. "The compilations shall be available only to a local, state, or national public health official or physician upon his written request." Even if we had any numbers to compile we would not be able to report to anyone except those entities.

For his second question....

On March 12, 2012, in coordination with the State Health Officer, nearly 3,000 letters were sent to licensed physicians in Wyoming. Most responses that were received back stated that those doctors do not perform abortions in Wyoming. I attached the letter in case you want to send him the letter that was sent.

Let me know if you want to discuss anything else.

Mariah

Cc: Korin Schmidt <korin.schmidt1@wyo.gov>, Jim McBride <jim.mcbride@wyo.gov>, Guy Beaudoin
<guy.beaudoin@wyo.gov>

There is nothing in statute that discusses the enforcement of reporting. The statute says that the attending physician has 20 days to submit the form prescribed by Vital Records Services. It outlines what should be in the report and not in the report; it outlines who can request a compilation of the reports; and lastly specifies that any reports and compilations of the reports are not to be stored electronically.

Penalties in this section speak more to the abortion procedures.

35-6-102,103 and 104--speaks to the viability of the embryo or fetus

35-6-111--only physicians and commonly accepted medical procedures

35-6-113,114 which is that a person is not required by law to perform an abortion-a physician can refuse.

35-6-115 --no selling or giving away the aborted child for experimentation

35-6-116--no advertising drug or nostrum for procuring abortion or miscarriage

35-6-118--outlines the procedures for minors and a gives penalty for violation of it

Please see below for response to the inquiry. Rebecca is from the susan b anthony pro-life group.

Hello Ms. Gonzales,

Thank you for contacting the Wyoming Department of Health's Vital Statistics Services (VSS) Office regarding information about Wyoming abortion statistics. Wyoming state law (W.S. 35-6-107) does require the filing of abortions performed within the state; however, for several years (from 2010 to current) VSS has not received any reports of abortions. On March 12, 2012, in coordination with the State Health Officer, nearly 3,000 letters were sent to licensed physicians in Wyoming. Most responses that were received back stated that those doctors do not perform abortions in Wyoming. With that said, the data from the CDC is the most current data available for Wyoming residents.

Please contact VSS at (307) 777-7632 if you would like further information.

Sincerely,
Mariah Storey

Is this still the accurate statutory requirement for abortion reporting?

From: Jim McBride [mailto:jim.mcbride@wyo.gov]**Sent:** Wednesday, May 30, 2012 5:05 PM**To:** Dale Bohren**Cc:** kim deti**Subject:** Re: Photo of sign in Casper

Dale, As I said this is the Office of Vital Records but I simply can not confirm these numbers. As I mentioned in our conversation,

Pursuant to W.S. § 35-6-107 through 109, physicians are required to complete and submit annually to the Wyoming Department of Health (WDH) an Induced Termination of Pregnancy Reporting (ITOP) form if they perform or prescribe an abortion in Wyoming.

We have received no forms in 2012, none in 2011 and none in 2010. Several months back we wrote to each physician in the state reminding them of this requirement. Today, we have received no forms.

I've cced Kim Deti above. She is the person to talk to or I need clearance from to provide any additional information. Although, I've given you what little I/we have.

Hope this helps,

On Wed, May 30, 2012 at 4:24 PM, Dale Bohren <Dale.Bohren@casperjournal.com> wrote:

Hi Jim,

Thank you for the interview this afternoon. I am sending this photo because the number of abortions advertised on this sign is between 5-6 abortions every day of the year on average, not 20 per day. So I want to confirm that this still seems wildly high compared to your zero numbers reported.

Thank you.

Sincerely,

But since we don't receive reports it's kind of a mute point. Although, I just want to point out that that statute limits what we can report. And I believe we are not allowed to store the records electronically. So even if we had reports I'm not sure we would provide anything--we would have to really think about what we reported.
